I have data to support the above surface water use reductions due to conservation efforts. YES  NO

JUL 19 2004

"The energy challenge facing California is real. Every California needs to take immediate action to reduce energy consumption. For a list of simple ways you can reduce demand and cut your energy costs, see our Web-site at <http://www.swrcb.ca.gov>.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or Water Rights in California, and (3) Appropriation of Water in California.

Water to this office. We have several pamphlets available. They include: (1) Statements of Water Division and Use, (2) Information Pertaining to Specific Exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future purposes.

Statements of Water Division and Use must be filed by riparian and pre 1914 appropriative water users as set forth in Water Code section 5100. An appropriate right is required for use of water on nonriparian land and for storage of water. Generally, appropriate rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriate rights can be granted to waters "foreign" to the natural stream system.

A riparian right is a riparian right to the natural flow of a stream but may not be used to store water for later use or divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system. Riparian rights may be used to divert the natural flow to the served parcel. Generally, a riparian water user must share the water supply with other riparian users. Reservation of the riparian right to the served source and must never have been served from the sources of supply by an intervening parcel without the same watershed as the water source or stream to take and use water on his riparian land. Riparian land must be in A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source or stream to take and use water on his riparian land. Riparian land must be in

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

 please number them in the space provided on the back of this form.

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

#### GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same shed as the water source and must never have been severed from the sources of supply by an intervening later use or to divert water which originates in a different watershed, or return flows from use of ground water.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversions and Use must be filed by a riparian and pre-1914 appropriative water users. The filing of a statement from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

## GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the source of supply by an intervening parcel without reservation of the riparian right to the severed parcel.

Generally, a riparian user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversions and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation, (3) assists the State to determine if additional upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

"Statement of Water Diversions and Use"  
"Information Pertaining to Water Rights in California"  
"Water Rights for Stockponds Constructed Prior to 1969"  
"Appropriation of Water in California"

| State quantity of water used each month in gallons or acre-feet | cubic feet per second<br>gallons per minute<br>gallons<br>acre-feet  |      |      |      |     |      |      |      |       |      |      |      |       |
| Year  | Jan.   | Feb. | Mar. | Apr. | May | June | July | Aug. | Sept. | Oct. | Nov. | Dec. | Total |

If monthly and annual use are not known, check months in which water was used. State extent of use in units, such as acres of each crop irrigated, average number of persons served, number of stock watered, etc.

**Maximum annual water use in recent years**

**Minimum annual water use in recent years** \_\_\_\_\_ gallons per acre-foot  
**Type of irrigation used** \_\_\_\_\_

Type of diversion facility: gravity  pump acre-foot

Method of measurement: weir....., flume.....

Purpose of use (check one):  electric power meter  water meter  estimate **X**

- F. Purpose of use (what water is being used for) Domestic use for Lookout and campground.

G. General description or location of place of use (use sketch of section grid on reverse side if you desire) \_\_\_\_\_

H. Year of first use as nearly as known 1915

- I. Name of person filing statement William E. Turpin  
Position District Ranger Organization U.S. Forest Service  
Address Box 35 Star Route, Berry Creek, California 95916

*I certify that the foregoing statements are true and correct to the best of my knowledge and belief.*

Date signed 12-15-66
